## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Watabe et al. (US Pat. No. 5,146,291).

Regarding claim 16, Watabe et al. teaches a sub-micron MOS transistor comprising: a substrate (2) (see fig. 1); and an active region (portion of the substrate as shown in fig 1.), including a gate region (4a) (see fig. 1) having a length of less than one micron (i.e. about 0.5 μm, see col. 7, lines 37-40 and 45-48, and col. 8, lines 23-24); a source region (5a) including a LDD source region (5b) (see fig. 1); and a drain region (6a) including a LDD drain region (6b) (see fig. 1); wherein the ion concentration in said source region (5a) and in said drain region (6a) is between about 1 x 10<sup>20</sup> to 1 x 10<sup>21</sup> cm<sup>-3</sup> (see col. 17, lines 22-25), and wherein the ion concentration in said LDD source region (5b) and in said LDD drain region (6b) is between about 5 x10<sup>18</sup> to 5 x 10<sup>19</sup> cm<sup>-3</sup> (see col. 17, lines2-5).

Regarding claim 17, Watabe et al. further teaches an insulating oxide layer (3), a source electrode (12), a gate electrode ( $V_g$ ), and a drain electrode (13) (see figs. 1 and 2B).

Application/Control Number: 10/621,852 Page 3

## Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to José R Díaz whose telephone number is (571) 272-1727. The examiner can normally be reached on 9:00-5:00 Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Thomas can be reached on (571) 272-1664. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
